

# Amalgamated Lifts - Interiors Car Reline Insight

Lifts are no longer just used to travel between different floors; they have now become an extension and representation of its building and users.

Amalgamated Lifts recently complete a car reline at Intimissimi, a Lingerie & Hosiery shop in Oxford Street (much to the engineers delight). The car reline consisted of clear glass walls, amtico wood effect flooring, tubular hand rails, skirting and trims all finished in satin stainless steel, white suspended powder coated ceiling and new full height cop and button indicators.

Amalgamated Lifts have the resources available to create a number of car relines and interiors to suit all types of builds and lift types.
